

Mongolia Growth Group Ltd.

Consolidated Financial Statements

December 31, 2022

(Expressed in Canadian dollars)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Mongolia Growth Group Ltd.

Opinion

We have audited the accompanying consolidated financial statements of Mongolia Growth Group Ltd. (the "Company"), which comprise the consolidated statements of financial position as at December 31, 2022 and 2021, and the consolidated statements of operations and comprehensive income (loss), changes in equity, and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2022 and 2021, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained in our audit is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current year. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of Investment Properties

As described in Note 11 to the consolidated financial statements, the carrying amount of the Company's investment properties was \$10,086,956 as of December 31, 2022. As more fully described in Notes 3 and 4 to the consolidated financial statements, investment properties are measured at fair value at each reporting period. Management uses valuation techniques, including the income approach, the sales comparison approach or a combination thereof, to determine the fair value of investment properties. There are significant unobservable inputs used in estimating the value of investment properties and significant judgements are made related to uncertainty of operating in an emerging market.

The principal considerations for our determination that the fair value of investment properties is a key audit matter are due to the estimation uncertainty underlying the valuations and the significant value of the investment properties at year-end. This determination required the use of appropriate valuation techniques which included significant unobservable inputs. This in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures to evaluate audit evidence relating to the judgments made by management in their assessment of the fair value of the investment properties.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures include, among others:

- Evaluating the competency, capabilities and objectivity of the third-party valuator used by management.
- Reviewing the valuations reports and substantively testing a sample of the assumptions within to independent sources of information.
- Utilizing our internal valuations department to conclude on the appropriateness of the methodology used in the valuations reports.
- Utilizing our internal valuations department to test the accuracy of the calculations in applying the methodology used in the valuations reports.
- Assessing management estimates underlying the valuation for evidence of bias or error.
- Reviewing title documents for properties and assessing the status of properties.
- Checking and evaluating the financial statement disclosures in relation to the fair value of investment properties.

Other Information

Management is responsible for the other information. The other information obtained at the date of this auditor's report includes Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

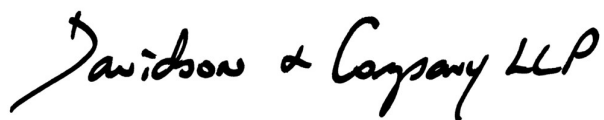

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Daniel Nathan.

Mongolia Growth Group Ltd.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

1 Corporate information

Mongolia Growth Group Ltd. (“MGG” or the “Company”) was incorporated in Alberta on December 17, 2007, and is a Merchant bank with real estate investments in Ulaanbaatar, Mongolia, a subscription product business and a public securities portfolio.

The Company trades on the TSX Venture Exchange, having the symbol YAK.

MGG has three wholly-owned subsidiaries at December 31, 2022; Mongolia (Barbados) Corp., MGG US Inc., and Lemontree PR LLC. Mongolia (Barbados) Corp. owns the wholly-owned subsidiaries MGG Properties LLC and Big Sky Capital LLC. Big Sky Capital LLC owns the wholly-owned subsidiaries, Carrollton LLC, Biggie Industries LLC, Zulu LLC, Crescent City LLC and Oceanus LLC (together “the investment property operations”). The investment property operations are conducted in Big Sky Capital LLC and its subsidiaries. No active business operations occur in Oceanus LLC at this time. MGG’s marketable securities are currently held in brokerage accounts owned by Mongolia (Barbados) Corp and MGG US Inc.

At December 31, 2022 and 2021, the principal subsidiaries of the Company, their geographic locations, and the ownership interest held by the Company, were as follows:

Name	Principal Activity	Ownership		Location
		December 31, 2022	December 31, 2021	
Mongolia (Barbados) Corp.	Holding Company and Brokerage Account	100%	100%	Barbados
Lemontree PR LLC	Real estate operations	100%	100%	Puerto Rico
MGG US Inc.	Investments	100%	100%	United States
MGG Properties LLC	Holding Company and Real estate operations	100%	100%	Mongolia
Big Sky Capital LLC	Holding Company and Real estate operations	100%	100%	Mongolia
Carrollton LLC	Real estate operations	100%	100%	Mongolia
Biggie Industries LLC	Real estate operations	100%	100%	Mongolia
Zulu LLC	Real estate operations	100%	100%	Mongolia
Crescent City	Real estate operations	100%	100%	Mongolia
Oceanus LLC	Real estate operations	100%	100%	Mongolia

The Company is registered in Alberta, Canada, with its Head Office at its registered and records address at Centennial Place, East Tower, 1900, 520 – 3rd Avenue S.W. Calgary, Alberta, Canada T2P 0R3. The Company’s Canadian headquarters are located at 100 King Street West, Suite 5600, Toronto, Ontario, M5X 1C9, Canada. The Company’s Mongolian investment property operations are based out of its office located at the MGG Properties Building on Seoul St. in Ulaanbaatar, Mongolia.

At December 31, 2022, the Company is organized into three segments based on the business operations:

- Big Sky Capital LLC and its subsidiaries own investment properties which are located in Ulaanbaatar, Mongolia and are held for the purpose of generating rental revenue, capital appreciation, and/or redevelopment; and
- The MGG Corporate office is located in Toronto, Canada.
- The Subscription Products office is located in Toronto, Canada.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

2 Basis of presentation

The consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and International Financial Reporting Interpretations Committee (IFRIC), as issued by the International Accounting Standards Board (IASB). The significant accounting policies used in the preparation of these consolidated financial statements are summarized in note 3.

These consolidated financial statements have been prepared on a going concern basis, meaning that the Company will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. The Company estimates it has sufficient working capital to continue operations for the upcoming 12 months.

The consolidated financial statements, including the notes to the consolidated financial statements, are presented in Canadian dollars (\$) which is the presentation currency and the functional currency of the parent Company. The functional currency of the Mongolian subsidiaries is the Mongolian National Tögrög (MNT). The functional currency of the Company's operating subsidiary in Barbados is the Canadian Dollar. The functional currency of the Company's operating subsidiaries in the United States is the US Dollar.

These consolidated financial statements were approved by the Board of Directors of the Company for issue on April 19, 2023.

3 Significant accounting policies

a. Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis, as modified by the revaluation of investment properties, marketable securities, options on futures, calls, puts and digital assets at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

b. Basis of consolidation

These consolidated financial statements include the accounts of MGG and its wholly-owned subsidiaries. Subsidiaries are entities controlled by MGG. Control exists when MGG is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of the subsidiaries are prepared for the same reporting year as MGG, using consistent accounting policies. Intercompany balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements. Upon the disposal of a subsidiary, amounts previously recognized in other comprehensive income in respect of that entity, are reclassified to profit or loss.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

4 Significant accounting policies (continued)

c. Financial instruments

Classification and measurement

The classification of financial assets is based on the Company's business models and the financial asset's contractual cash flow characteristics. Business models are reassessed periodically, and contractual cash flow characteristics are assessed to determine whether they are "Solely payments of principal and interest" (SPPI).

Financial assets, including hybrid contracts, are classified as either amortized cost, fair value through other comprehensive income (FVOCI), or the residual classification of fair value through profit and loss (FVTPL).

Financial assets with cash flows that are SPPI and are held within a business model where the objective is to hold the financial assets in order to collect contractual cash flows ("Hold to collect" business model) are measured at amortized cost.

Financial assets with cash flows that are SPPI and are held within a business model where the dual objective is to hold the financial assets in order to collect contractual cash flows and selling financial assets ("Hold to collect and sell" business model) are measured at FVOCI.

Financial assets with cash flows that are SPPI but are not held within the "Hold to collect" or "Hold to collect and sell" business models are measured at FVTPL.

Financial assets with cash flows that do not meet the SPPI conditions are measured at FVTPL.

Marketable securities held for trading are classified as FVTPL. For all other marketable securities that are not held for trading, the Company, on initial recognition, may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by-investment basis.

Financial liabilities are measured at amortized cost unless they must be measured at fair value through profit or loss (such as instruments held for trading or derivatives) or if the Company elects to measure them at fair value through profit or loss.

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the Company has transferred substantially all risks and rewards of ownership. Financial assets and financial liabilities are recognized on the trade date, the date on which the Company commits to purchase or sell the investment.

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable and unconditional right to offset the recognized amounts and when there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3 Significant accounting policies (continued)

c. Financial instruments (continued)

i) Financial assets and financial liabilities held for trading

A financial asset or financial liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition it is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorized as held for trading. The Company does not classify any derivatives as hedges in a hedging relationship.

The Company makes short sales in which a borrowed security is sold in anticipation of a decline in the market value of that security, or it may use short sales for various arbitrage transactions.

From time to time, the Company enters into derivative financial instruments for speculative purposes. These instruments are marked to market, and the corresponding gains and losses for the year are recognized in the consolidated statement of operations. The carrying value of these instruments is fair value, which approximates the amount that would be received or paid if the derivative were to be transferred to a market participant at the consolidated statement of financial position date. The fair value is included in marketable securities if in an asset position or marketable securities sold short if in a liability position.

As at December 31, 2022, the Company had a net fair market value of approximately \$5,159,131 of derivative financial liabilities that will expire with no value if out of the money at expiration (Note 7).

ii) Financial assets managed as fair value through profit or loss

Financial assets managed as fair value through profit or loss are financial instruments that are not classified as held for trading but form part of a portfolio that is managed and whose performance is evaluated on a fair value basis in accordance with the Company's documented investment strategy.

The Company's marketable securities owned, unrealized gain on futures contract, and marketable securities sold short are all classified as held for trading and carried at FVTPL.

Recognition, derecognition and measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognized at fair value. Transaction costs are expensed as incurred in the consolidated statement of operations. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of financial assets or financial liabilities at fair value through profit or loss are presented in the consolidated statement of operations in realized and unrealized gain on short-term investments.

Financial assets at amortized cost

Classification

Financial assets at amortized cost are non-derivative financial assets with cash flows that are "solely from the payment of principal and interest" (SPPI) and that are managed under a "held to collect" business model.

The Company's financial assets at amortized cost consist of cash, due from brokers, as well as accounts receivable and long term receivable, which are included in other assets.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3 Significant accounting policies (continued)

c. Financial instruments (continued)

Recognition and measurement

At initial recognition, the Company measures its financial assets at its fair value plus transactions costs incurred. The amortized cost is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and adjusted for any loss allowance.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets.

Financial liabilities at amortized cost

Classification

The Company's financial liabilities at amortized cost are non-derivative liabilities that comprise trade payables and accrued liabilities, due to broker, and short-term and long term CEBA loan.

Recognition and measurement

Trade payables and accrued liabilities are initially recognized at fair value. Subsequently, they are measured at amortized cost using the effective interest method. Due to brokers and CEBA loans are recognized initially at fair value, net of any transaction costs incurred, and subsequently at amortized cost using the effective interest method.

Impairment

Substantially all of the Company's financial assets at amortized cost are short-term assets and from sources with low credit risk. The Company monitors its financial assets measured at amortized cost and counterparty risk.

Fair Value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Financial assets and liabilities recorded at fair value in the consolidated statement of financial position are measured and classified in a hierarchy consisting of three levels for disclosure purposes. The three levels are based on the priority of the inputs to the respective valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities

- The Company defines active markets based on the frequency of valuation and any restrictions or illiquidity on disposition of investments. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities. Fair value is based on market price data for identical assets obtained from the investment custodian, investment managers or dealer markets. The Company does not adjust the quoted price for such instruments.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

c. Financial instruments (continued)

Level 2: Quoted prices in markets that are not active or inputs that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices)

- Level 2 inputs include observable market information, including quoted prices for assets in markets that are considered less active. Fair value is based on or derived from market price data for same or similar instruments obtained from the investment custodian, investment managers or dealer markets.

Level 3: Unobservable inputs that are supported by little or no market activity and are significant to the estimated fair value of the assets or liabilities

- Level 3 assets and liabilities would include financial instruments whose values are determined using internal pricing models, discounted cash flow methodologies, or similar techniques that are not based on observable market data, as well as assets or liabilities for which the determination of estimated fair value requires significant management judgement or estimation.

The Company has determined the estimated fair values of its financial instruments based upon appropriate valuation methodologies.

The levels of the fair value inputs used in determining estimated fair value of the Company's financial assets at fair value through profit or loss as at December 31, 2022 and 2021, is shown below.

	Estimated fair values			
	December 31, 2022	Level 1	Level 2	Level 3
Marketable securities	\$49,237,506	\$49,237,506	-	-
Unrealized gain on futures contract	-	-	-	-
Marketable securities sold short	(\$5,159,131)	(\$5,159,131)	-	-
	\$44,078,375	\$44,078,375	-	-

	Estimated fair values			
	December 31, 2021	Level 1	Level 2	Level 3
Marketable securities	\$37,802,853	\$37,802,853	-	-
Unrealized gain on futures contract	\$311,437	\$311,437	-	-
Marketable Securities sold short	(\$2,652,329)	(\$2,652,329)	-	-
	\$35,461,960	\$35,461,960	-	-

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

c. Financial instruments (continued)

At December 31, 2022 and 2021 there were no financial assets or liabilities measured and recognized in the statement of financial position at fair value that would be categorized as level 2 and 3 in the fair value hierarchy above.

d. Investment properties

Investment properties include properties held to earn rental revenue, for capital appreciation, and/or for redevelopment. Investment properties are initially measured at fair value which is most often the purchase price plus any directly attributable expenditures. Investment properties are subsequently measured at fair value, which reflects market conditions at the date of the consolidated statement of financial position. Gains or losses arising from changes in the fair value of investment properties are recognized in the consolidated statement of

operations in the year they arise. A key characteristic of an investment property is that it generates cash flows largely independently of the other assets held by an entity.

Subsequent expenditure is included in the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the consolidated statement of operations during the financial period in which they occur.

Substantially all of the Company's income generating properties and properties under development are investment properties.

Properties under development are measured at cost.

Certain land leases held under an operating lease are classified as investment properties when the definition of an investment property is met. At inception these leases are recognized at the lower of the fair value of the property and the present value of the minimum lease payments.

Some properties may be partially occupied by the Company, with the remainder being held for rental income or capital appreciation. If that part of the property occupied by the Company can be sold separately, the Company accounts for the portions separately. The portion that is owner-occupied is accounted for under IAS 16, and the portion that is held for rental income, capital appreciation or both is treated as investment property under IAS 40. When the portions cannot be sold separately, the whole property is treated as investment property only if an insignificant portion is owner-occupied. The Company considers the owner-occupied portion as insignificant when the property is more than 90% held to earn rental income or capital appreciation. In order to determine the percentage of the portions, the Company uses the size of the property measured in square metres.

The fair value of investment properties was based on the nature, location and condition of the specific asset. The fair value is calculated at December 31 on the majority of investment properties by an independent, professional, qualified appraisal firm, whose appraisers hold recognized relevant, professional qualifications and who have recent experience in the locations and categories of the investment properties valued. The remaining investment properties' fair value was calculated by management and was performed by qualified individuals with recent experience in the locations and categories of the investment properties valued.

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

e. Assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are categorized as held for sale at the point in time when the asset or disposal group is available for immediate sale. Management has committed to a plan to sell and is actively locating a buyer at a sales price that is reasonable in relation to the current fair value of the asset, and the sale is probable and expected to be completed within a one year period. Investment properties measured under the fair value model and held for sale continue to be measured by the guidelines of IAS 40 – Investment Property. All other assets held for sale are stated at the lower of carrying amounts and fair value less selling costs. An asset that is subsequently reclassified as held and in use, with the exception of investment property measured under the fair value model, is measured at the lower of its recoverable amount and the carrying value that would have been recognized had the asset never been classified as held for sale.

f. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable. The Company's specific revenue recognition criteria are as follows:

i) Rental revenue

The Company has not transferred substantially all of the benefits and risk of ownership of its investment properties, and therefore, the Company accounts for leases with its tenants as operating leases. Rental revenue includes all amounts earned from tenants related to lease agreements including property tax and operating cost recoveries.

The Company reports rental revenue on a straight-line basis, whereby the total amount of cash to be received under a lease is recognized into earnings in equal periodic amounts over the term of the lease.

Contingent rents are recognized as revenue in the period in which they are earned.

Amounts payable by tenants to terminate their lease prior to their contractual expiry date (lease cancellation fees) are included in rental revenue at the time of cancellation.

ii) Interest income

Interest income is recorded as it accrues using the effective interest method.

iii) Subscription Revenue

Subscription revenue consists of subscriptions to its an investment data analytics service. The subscription service provides customers the right to access its weekly data publications. The Company's subscription service represents a series of distinct publications produced each week and are made available to the customer continuously throughout the contractual period. However, the extent to which the customer uses the services may vary at the customer's discretion.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

f. Revenue recognition (continued)

A performance obligation is a commitment in a contract with a customer to transfer products or services that are distinct. Determining whether products and services are distinct performance obligations that should be accounted for separately or combined as one unit of accounting may require significant judgment. The Company's data analytics service is considered to have a single performance obligation where the customer simultaneously receives and consumes the benefit, and as such revenue is recognized ratably over the term of the contractual agreement.

For the Company's data subscription product, the Company generally receives payment for the full subscription contract up front.

iv) Unearned revenue

Payments received in advance of services being rendered are recorded as unearned revenue and recognized ratably over the requisite service period.

g. Digital Assets

The Company's digital assets are primarily traded in active markets and are purchased with the intent to re-sell in the near future, generating a profit from the fluctuations in prices or margins. As a result digital assets are measured at fair value less cost to sell, with changes in fair value recognized in the consolidated statements of operations.

h. Cash

Cash includes cash held at banks or on hand and demand deposits.

i. Property and equipment

On initial recognition, property and equipment are valued at cost, being the purchase price and directly attributable cost of acquisition or construction required to bring the asset to the location and condition necessary to be capable of operating in a manner intended by the Company, including appropriate borrowing costs and the estimated present value of any future unavoidable costs of dismantling and removing items. Property and equipment is subsequently measured at cost less accumulated depreciation, less any accumulated impairment losses. All repairs and maintenance costs are charged to the consolidated statement of operations during the period in which they occur.

Depreciation is recognized in the consolidated statement of operations and is provided on a straight-line basis over the estimated useful life of the assets as follows:

Buildings	Straight-line over 40 years
Furniture and fixtures	Straight-line over 5 to 10 years
Equipment	Straight-line over 1 to 5 years

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

i. Property and equipment (continued)

Impairment reviews are performed when there are indicators that the net recoverable amount of an asset may be less than the carrying value. The net recoverable amount is determined as the higher of an asset's fair value less cost to dispose and value in use. Impairment is recognized in the consolidated statement of operations, when there is objective evidence that a loss event has occurred which has impaired future cash flows of an asset. In the event that the value of previously impaired assets recovers, the previously recognized impairment loss is recovered in the consolidated statement of operations at that time.

An item of property and equipment is derecognized upon disposal or when no further economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of operations in the period the asset is derecognized.

Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

j. Income taxes

Income taxes are comprised of both current and deferred taxes. Current tax and deferred tax are recognized in the statement of operations except to the extent that it relates to items recognized in Other Comprehensive Income ("OCI") or directly in equity. In this case, the tax is recognized in OCI or directly in equity respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the consolidated statement of financial position date in the countries where the Company and its subsidiaries operate and generate taxable income and are measured at the amount expected to be recovered from or paid to the taxation authorities for the current and prior periods.

Deferred income tax assets and liabilities are recorded for the expected future income tax consequences of events that have been included in the consolidated financial statements or income tax returns. Deferred income taxes are recognized for all significant temporary differences between the tax and financial statement bases for assets and liabilities and for certain carry-forward items, such as losses and tax credits not utilized from prior years. However, if the deferred income tax arises from initial recognition of an asset or a liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable income, it is not accounted for.

Recognition of deferred tax assets for unused tax losses, tax credits and deductible temporary differences is restricted to those instances where, in the opinion of management, it is probable that future taxable profit will be available against which the deferred tax asset can be realized. Deferred income tax assets and liabilities are adjusted for the effects of changes in tax laws and rates, on the date the changes in tax laws and rates have been enacted or substantively enacted.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

k. Foreign exchange transactions

Foreign currency transactions are translated at the rate of exchange in effect on the dates they occur. Gains and losses arising as a result of foreign currency transactions are recognized in the consolidated statement of operations. At reporting dates, monetary items are translated at the closing rate of exchange in effect at the consolidated statement of financial position date.

Translation of foreign operations

For the purpose of the consolidated financial statements, the results and financial position of the Company's operations are expressed in Canadian dollars, which is the functional currency of the parent, and the presentation currency of the consolidated financial statements.

The Company translates the assets, liabilities, income and expenses of its subsidiaries which have a functional currency other than the Canadian dollar, to Canadian dollars on the following basis:

- Assets and liabilities are translated at the closing rate of exchange in effect at the consolidated statement of financial position date.
- Income and expense items are translated using the average rate for the month in which they occur, which is considered to be a reasonable approximation of actual rates.
- Equity items are translated at their historical rates.
- The translation adjustment from the use of different rates is included as a separate component of equity, in accumulated other comprehensive income (loss).

k. Comprehensive income

Comprehensive income consists of net income (loss) and OCI. OCI includes changes in unrealized gains (losses) on the translation of subsidiaries with a functional currency other than the Canadian dollar.

l. Share capital and deferred share issuance costs

Ordinary shares issued by the Company are classified as equity. Costs directly identifiable with the raising of capital will be charged against the related share issue, net of any tax effect.

Costs related to shares not yet issued are recorded as deferred financing costs. These costs will be deferred until the issuance of the shares to which the costs relate, at which time the costs will be charged against the related share issuance or charged to operations if the shares are not issued.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

m. Earnings (loss) per share

For both continuing and discontinued operations, the Company presents basic and diluted earnings (loss) per share (EPS) data for its common shares. Basic EPS is calculated by dividing the results of operations attributable to ordinary shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted EPS is determined by adjusting the results of operations attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares, which comprise share options.

n. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of operations, has been identified as the Chief Executive Officer. The Company is now managed as three operating segments based on how information is produced internally for the purpose of making operating decisions. The segments are defined as investment property operations, subscription products and corporate.

o. Leases

IFRS 16, Leases ("IFRS 16") sets out the principles for the recognition, measurement, presentation and disclosure of leases for both the lessee and the lessor.

From a lessee point of view, the Company has entered into Mongolian government land leases on some of its investment properties. The Company, as a lessee, has determined, based on an evaluation of the terms and conditions of the arrangements, that these land leases meet the definition of an investment property and has classified them as such; therefore, the fair value model is applied to those assets, and gains and losses on changes in fair value are recorded in the consolidated statements of operations. The payments on these leases are nominal, and are therefore exempt from recognition as low-value leases.

The Company has also entered into commercial and residential property leases on its investment properties. The Company as a lessor, has determined, based on an evaluation of the terms and conditions of the arrangements, that it retains the significant risks and rewards of ownership of these properties and therefore accounts for these agreements as operating leases.

For other leases of low-value assets or short-term leases that end within 12 months of the commencement date and which have no renewal or purchase option, the Company has elected to apply the recognition exemptions specified in IFRS 16, allowing the Company to continue to expense the lease payments in the period in which they are incurred. The total of such expenses was \$4,620 for the 2022 fiscal year (2021 - \$5,092).

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

p. Provisions and contingent liabilities

Provisions are recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of the provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense of any provision is recognized in the consolidated statement of operations net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

Contingent liabilities are disclosed if there is a possible future obligation as a result of a past event, or if there is a present obligation as a result of a past event but either a payment is not probable or the amount cannot be reasonably estimated.

q. Due from and to brokers

Amounts due from and to brokers represent negative cash balances or margin accounts, and pending trades on the purchase or sale of securities. Where terms in the prime brokerage agreements permit the prime broker to settle margin balances with cash accounts or collateral, the due from brokers cash balances are offset against the due to brokers margin balances at each prime broker.

r. Marketable Securities

The Company presents results from trading marketable securities on both a realized and unrealized basis separately in the consolidated statements of operations. A realized gain or loss is recorded upon transfer of ownership of a marketable security, calculated as proceeds (net of broker fees) less its cost which is measured on a first-in-first-out ("FIFO") basis. Unrealized gains and losses are the fair value adjustments to positions still held at reporting dates.

s. Futures Contracts

The Company may invest in financial futures contracts ("futures contracts") for the purpose of hedging its existing portfolio securities or for speculative reasons.

Upon entering into a futures contract, the Company is required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount. This payment is known as "initial margin." Subsequent payments, known as "variation margin," are calculated each day, depending on the daily fluctuations in the fair value/market value of the underlying assets. An unrealised gain or loss equal to the variation margin is recognised on a daily basis and carried on the consolidated statements of financial position. When the contract expires or is closed the gain (loss) is realised and is presented in the Statement of Operations as a realised gain (loss) on short term investments. Futures contracts are valued daily at their last quoted sale price on the exchange they are traded. A "sale" of a futures contract means a contractual obligation to deliver the securities or foreign currency called for by the contract at a fixed price at a specified time in the future. A "purchase" of a futures contract means a contractual obligation to acquire the securities, commodities or foreign currency at a fixed price at a specified time in the future.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

3. Significant accounting policies (continued)

t. Current Accounting Policy Changes

There were no accounting policy changes which impacted the Company in the December 31, 2022 fiscal year.

u. Future Accounting Policy Changes

IAS 1, Presentation of Financial Statements ("IAS 1") The IASB issued 'Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)' in January 2020, affecting the presentation of liabilities in the statement of financial position. In October 2022, the IASB issued 'Non-current Liabilities with Covenants (Amendments to IAS 1)' affecting the required disclosures for non-current liabilities with covenants. The narrow-scope amendments to IAS 1 clarify that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the expectations of the entity or events after the reporting date. The amendments also clarify what IAS 1 means when it refers to the 'settlement' of a liability. The amendments must be applied retrospectively in accordance with the normal requirements of IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors ("IAS 8"). The amendments are effective for annual periods beginning on or after January 1, 2024, with earlier application permitted. The amendments have not been early adopted by the Company. The Company is currently assessing any potential impact of these amendments.

v. Comparative Figures

Certain comparative figures have been reclassified to conform with the basis of presentation applied for the year ended December 31, 2022.

4 Significant accounting estimates and judgements

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgements are continually evaluated based on historical experiences and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in the consolidated statements of operations in the period of the change, if the change affects that period only, or in the period of the change and future periods, if the change affects both. Significant estimates made in the preparation of these consolidated financial statements include the following areas:

- Fair value of investment properties – An external appraiser estimates the fair value of the majority of investment properties by dollar value annually.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

4 Significant accounting estimates and judgements (continued)

The remaining balance of investment properties was valued internally. The fair value of investment properties is based on the nature, location and condition of the specific asset. The fair value of investment properties represents an estimate of the price that would be made in an arm's length transaction between knowledgeable, willing parties. This fair value assumes that the Company is in possession of the property's land and property titles where applicable. Management judges that the Company has the appropriate titles for each of the properties classified as Investment Properties. Properties whereby management judges that the Company's titles are at risk, have been impaired to reflect the level of risk estimated by management.

- The Company operates in the emerging real estate market of Mongolia, which given its current economic, political and industry conditions, gives rise to an increased inherent risk given the lack of reliable and comparable market information. The significant estimates underlying the fair value determination are disclosed in note 11. Changes in assumptions about these factors could materially affect the carrying value of investment properties. In addition, the significant global uncertainty resulting from the novel coronavirus ("COVID-19") pandemic has reduced the availability of reliable market metrics to inform opinions, and therefore a higher degree of judgment must be applied. Consequently, fair values are subject to significant change.
- Valuation of marketable securities – The Company recognizes marketable securities at fair value. Fair value is determined on the basis of market prices from independent sources, if available. If there is no market price, then the fair value is determined by using valuation models with inputs derived from observable market data where possible but where observable data is not available, judgement is required to establish fair values.
- Operating environment of the Company - Mongolia displays many characteristics of an emerging market including relatively high inflation and interest rates. The tax and customs legislation in Mongolia is subject to varying interpretations and frequent changes. The future economic performance of Mongolia is tied to the continuing demand from China and global prices for commodities as well as being dependent upon the effectiveness of economic, financial and monetary measures undertaken by the Government of Mongolia together with tax, legal, regulatory and political developments. Management is unable to predict all developments that could have an impact on the Mongolian economy and consequently what effect, if any, they could have on the future financial position of the Company.

Significant judgements made in the preparation of these consolidated financial statements include the following:

- Judgement is required in determining whether an asset meets the criteria for classification as assets held for sale and or as discontinued operations in the consolidated financial statements. Criteria considered by management include the existence of and commitment to a plan to dispose of the assets, the expected selling price of the assets, the probability of the sale being completed within an expected time frame of one year and the period of time any amounts have been classified within assets held for sale.

The Company reviews the criteria for assets held for sale each quarter and reclassifies such assets to or from this financial position category as appropriate. On completion of the sale, management exercises judgement as to whether the sale qualifies as a discontinued operation.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

4 Significant accounting estimates and judgements (continued)

As at December 31, 2022 and 2021, management has made the judgment that none of the Company's assets meet the criteria to be classified as held for sale. While this is due to a number of factors, a primary reason is that due to the conditions of the Mongolian economy and the lack of liquidity in the market, management was unable to conclude that the sale of any significant size asset could be considered highly probable.

- Judgement is required in determining whether the Company's Investment property and land use rights titles are at risk. As at December 31, 2020, management made the judgment that Investment Properties whereby the land title has recently expired but is expected to be renewed in the near future should continue to be classified as Investment Properties. Properties whereby management judges that the Company's titles are at risk, have been impaired to reflect the level of risk estimated by management. As of December 31, 2022, all land titles of the Company's Investment Properties were current.

5 Cash and cash equivalents

Cash at banks earns interest at floating rates based on daily bank deposit rates. The component of cash accounts currently consists only of cash amounts held in banks or on hand.

The following table discloses the geographical location of cash:

	2022	2021
	\$	\$
Barbados	64,643	1,560,652
Canada	1,579,747	274,900
United States	213,209	313,036
Mongolia	193,646	247,723
Total cash	2,051,245	2,396,311

Cash is not collateralized. The carrying amount of cash approximates fair value.

The following table discloses the breakdown of cash and cash equivalents:

	2022	2021
	\$	\$
Cash	707,419	2,396,311
Cash equivalents*	1,343,826	-
Total cash and cash equivalents	2,051,245	2,396,311

*Cash equivalents are held in a GIC at a Canadian bank.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

5 Cash and cash equivalents (continued)

The credit quality of cash balances may be summarized based on Standard and Poor's ratings or equivalents of Moody's and/or Fitch ratings. The credit quality at December 31 was as follows:

	2022	2021
	\$	\$
Cash on hand	1,750	2,272
A or A+ rated	1,620,438	460,755
B- or B+ rated	269,152	368,234
BBB+ rated	63,361*	1,559,329
Unrated	96,544	5,721
Total cash	2,051,245	2,396,311

*Cash is held in a brokerage account, at which the Company also has a margin balance due and payable at December 31, 2022 (Note 6).

The unrated balance relates to one private bank in Barbados (2021 – one), one brokerage company in Canada (2021 – one) and a cryptocurrency platform. The BBB+ rating relates to a brokerage company in the United States.

6 Credit facilities and due from and due to brokers

a) Credit facilities

During the year ended December 31, 2020, the Company qualified for a government-guaranteed line of credit (Canada Emergency Business Account “CEBA”) of \$40,000 which was interest-free until December 31, 2020. On January 1, 2021, the line of credit converted to a 2-year, 0% interest term loan to be repaid by December 31, 2022 at which time a 25% balance forgiveness (\$10,000) will apply if the loan is repaid by such date. On January 1, 2021 the Company qualified for an additional \$20,000 2-year, 0% interest term loan to be repaid by December 31, 2022. The Company has the option to exercise a 3-year term extension on the loans by December 31, 2022, if the loans are not repaid by then, at which time, the remaining unpaid balance of the loans will bear interest at 5% interest per annum during the extension period and must be paid in full by December 31, 2025. In October 2022, the Government announced that the deadline for the partial loan forgiveness and interest-free period has been extended to December 31, 2023.

Short and long term debt

	2022	2021
	\$	\$
Current	60,000	60,000
	60,000	60,000

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements

(Expressed in Canadian dollars)

6 Credit facilities and due from and due to brokers (continued)

a) Due from and due to brokers

The Company has margin facilities with its prime brokers. As at December 31, 2022 and 2021, the Company's amounts due to brokers have no specific repayment terms, and they are governed by the margin terms set forth in the prime brokerage agreements. As at December 31, 2022, the Company had net margin borrowings of \$7,329,685 (2021 – net margin borrowings of \$7,614,540). The fair value of the collateral-listed equity securities is calculated daily and compared to the Company's margin limits. The prime brokers can at any time demand full or partial repayment of the margin balances and any interest thereon or demand the delivery of additional assets as collateral.

Due from and due to brokers balances are presented on a net basis by broker in the consolidated statement of financial position. Under the prime broker agreements, the broker may upon events of default offset, net and/or regroup any amounts owed by the Company to the broker by amounts owed to the Company by the broker. The following tables set out the offsetting of the Company's various accounts with prime brokers.

Due from and due to brokers

	2022		
	Gross amounts due from brokers \$	Gross amounts due to brokers \$	Net amounts \$
Due from brokers	14,203	(14,203)	-
Due to brokers	-	(7,393,046)	(7,393,046)

	2021		
	Gross amounts due from brokers \$	Gross amounts due to brokers \$	Net amounts \$
Due from brokers	6,872	(4,552)	2,320
Due to brokers	-	(9,173,869)	(9,173,869)

A “purchase” of a futures contract means a contractual obligation to acquire the securities, commodities or foreign currency at a fixed price at a specified time in the future and is not included on the consolidated statements of financial position. An unrealised gain or loss equal to the change in value of the contract is recognised on a daily basis and carried on the consolidated statements of financial position as futures contracts.

8 Subscription Revenue

The Company's revenue from contracts with customers is comprised of investment data analytics subscriptions.

The Company has built a data analytics service, named KEDM, that tracks various event-driven strategies. The Company initiated a paywall on July 1, 2021 to start monetizing this service. Revenue earned during the period is classified as subscription revenue on the consolidated statements of operations. Revenue collected that has not yet been earned, have been classified as unearned revenue and will be classified according to the Company's revenue policies described in note 3.

Contract Liabilities:

As of December 31, 2022, the Company has unearned revenue of \$1,547,154 to be fully recognized by the end of July 2024, in accordance with contract terms (December 31, 2021 - \$1,035,471).

	December 31, 2022 \$	December 31, 2021 \$
Opening balance	1,035,471	-
Additions	3,685,713	1,979,882
Revenue earned	(3,174,031)	(944,411)
Closing balance	1,547,154	1,035,471

MGG has engaged an arm's length company to compile and produce the KEDM report on an ongoing basis, while MGG will act as the distributor and marketer of the product. As a part of this engagement, MGG has agreed to pay certain direct and approved expenses related to producing KEDM in addition to 20% of quarterly earned revenues above a threshold of \$125,000 USD. The Company paid \$476,236 in revenue share during 2022 (December 31, 2021 - \$111,541), classified as subscription product expenses in note 22. Most of the expenses related to the unearned revenue have not yet been incurred and are not reflected in the Company's financial statements. MGG owns all intellectual property related to KEDM and the arm's length company disclaims any ownership or rights to the intellectual property. The agreement can be discontinued by either party following a reasonable transition period and MGG can engage a substitute party to continue the production of KEDM. Beginning on January 1, 2023, MGG has engaged Praetorian PR LLC (PPR), a Puerto Rican company owned by the MGG's Chairman and CEO to produce KEDM. Refer to note 25 for further details on the arrangement.

(Expressed in Canadian dollars)

11 Investment properties (continued)

Investment properties with an aggregate fair value of \$10,020,823 (2021 - \$10,187,412) in addition to one property classified as PPE with a value of \$1,203,975, were valued by external independent valuation professionals who are deemed to be qualified appraisers who hold a recognized, relevant, professional qualification and who have recent experience in the locations and categories of the investment properties valued. The remaining balance of investment properties were valued internally.

The Company determined the fair value of investment properties using the income approach and the sales comparison approach, which are generally accepted appraisal methodologies.

Under the income approach, the methodology used was the direct capitalization approach which is based on rental income and yields. Rental incomes were based on current rent and reasonable and supportable assumptions that represent what knowledgeable, willing parties would assume about rental income from future rent in light of current conditions adjusted for non-recoverable property costs. Yields were determined using data from real estate agencies, market reports and property location among other things in determining the appropriate assumptions. Under this method, year one income is stabilized and capped at a rate deemed appropriate for each investment property.

The sales comparison approach analyzes all available information of sales of comparable properties that have recently taken place or have recently been marketed and adjusts the price to reflect differences in the property valued and sold.

The entire portfolio of investment properties has been valued using the income approach, the sales comparison approach or a combination thereof.

Due to the COVID-19 pandemic and its ongoing impact on the economy, and specifically its unknown future impact on the real estate market, there is heightened uncertainty surrounding the valuation of the investment properties. Consequently, there is a need to apply a higher degree of judgment as it pertains to the forward-looking assumptions that underlie the Company's valuation methodologies. In addition, less weight can be ascribed to previous market evidence, for comparative purposes, to inform opinions of value. Given this impact on the availability of reliable market metrics, fair values at December 31, 2022 may be subject to material change.

The Company currently has a standing agreement with the owner of a 42 sq. meter apartment which has been included in one of the Company's properties classified as land and redevelopment. The agreement entitles the owner of the apartment to 84 sq. meters of space on the first floor of a new building to be built on this land. In this agreement, the Company had an obligation to complete the construction of a new building by the end of fiscal 2017 and the agreement was not extended. A liability of \$261,648 (2021 - \$263,667) is currently included in the Company's trade payables and accrued liabilities (note 13) to reflect this liability. In addition, the Company has recognized an unrealized fair value impairment of \$887,732 included in investment properties (2021 - \$995,949) in excess of the fair value adjustment calculated using the valuation approaches described. This adjustment is management's estimate of the markets perception of the risk related to this agreement, and is included within the unrealized gain (loss) on fair value adjustment on Investment properties within profit and loss.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

11 Investment properties (continued)

Under the fair value hierarchy, the fair value of the Company's investment properties is considered a level three, as defined in note 3.

The key valuation assumptions for commercial investment properties are as follows:

	2022		
	Maximum	Minimum	Weighted- average
Capitalization rate	13.1%	12.6%	13.0%

	2021		
	Maximum	Minimum	Weighted- average
Capitalization rate	13.1%	9.0%	11.8%

The following sensitivity table outlines the impact of a 0.25% change in the weighted average capitalization rate on investment properties at 2022:

	Change to fair value if capitalization rate increased 0.25%	Change to fair value if capitalization rate decreases 0.25%
Investment property	(16,984)	17,651

Additional valuation assumptions include the rental revenue per square meter, grade quality of the property, and comparable market data.

Investment properties of \$66,188 (2021 - \$73,321) have no rental revenue associated with them at December 31, 2022.

Investment properties include land use rights held under operating leases with an aggregate fair value of \$3,646,835 (2021 – \$3,841,192) at December 31, 2022.

Certain investment properties held by the Company are leased out (the Company is the lessor) under operating leases. The future minimum lease payments under non-cancellable leases are as follows:

	2022	2021
	\$	\$
Less than 1 year	468,191	608,538
Between 1 and 5 years	226,289	265,126
Beyond 5 years	-	-
	694,480	873,664

Mongolia Growth Group Ltd.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

11 Investment properties (continued)

Direct operating expenses arising from investment properties that generated rental income during the year was \$769,501 (2021 – \$757,564). Direct operating expenses arising from investment properties that did not generate rental income during the year was \$1,352 (2021 - \$1,536).

The Company's operating leases, in which the Company is the lessor, are structured such that the weighted average length of the leases as at December 31, 2022 was 12.6 months (10.6 months as at December 2021), calculated as a percentage of monthly revenues.

Change in unrecognised deductible tax differences	53,000	(2,523,000)
Total income tax expense	2,689,279	532,605
Provision for income taxes		
Current	727,001	1,197
Deferred	1,962,278	531,408
	2,689,279	532,605

Mongolia Growth Group Ltd.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

14 Income taxes (continued)

b) Deferred income taxes

Differences between IFRS and statutory taxation regulations in Mongolia give rise to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and their tax bases. The Company did not recognize a deferred tax asset in these consolidated financial statements as there is uncertainty with regard to the recoverability of the asset for both the Canadian and Mongolian entities.

The significant components of the Company's deferred tax assets and liabilities are as follows:

	2022 \$	2021 \$
Deferred Tax Assets (liabilities)		
Property and equipment	67,000	52,000
Investment properties	(354,000)	(434,244)
Marketable security	(2,695,522)	(1,637,000)
Digital assets	33,000	-
Non-capital losses available for future period	49,000	1,028,000
	(2,900,522)	(991,244)
Unrecognized deferred tax assets	(72,000)	(19,000)
Net deferred tax liability	(2,972,522)	(1,010,244)

The significant components of the Company's temporary differences, unused tax credits and unused tax losses that have not been included on the consolidated statement of financial position are as follows:

Temporary Differences	2022	Expiry Date Range	2021	Expiry Date Range
Property and equipment	62,000	No expiry date	11,000	No expiry date
Non-capital losses available for future period	131,000	2031 to 2032	58,000	No expiry date

Tax attributes are subject to review, and potential adjustment by tax authorities.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements

(Expressed in Canadian dollars)

15 Share capital and contributed surplus

Common shares

The Company is authorized to issue an unlimited number of common and preferred shares.

The issued and outstanding common shares are as follows:

	Number of shares	Amount \$
Balance, December 31, 2020	31,281,499	53,165,247
Shares re-purchased	-	(2,161,125)
Treasury stock cancelled	(3,503,000)	-
Balance, December 31, 2021	27,778,499	51,004,122
Shares re-purchased	-	(456,992)
Treasury stock cancelled	(68,000)	-
Balance, December 31, 2022	27,710,499	50,547,130

As at December 31, 2022, the Company held 234,600 (2021-nil) shares in treasury.

Options

There were no options outstanding as of December 31, 2022 and the Company's option plan lapsed in 2021.

Restricted Stock Awards (RSA)

During the year, the Company renewed its Restricted Stock Award plan ("the RSA Plan") whereby it can grant RSAs to directors, officers, employees, and technical consultants of the Company. The maximum number of RSAs that may be reserved for issuance under the RSA Plan is limited to 300,000 common shares. The Restricted Period in respect to the Restricted Shares shall end once the Restricted Shares shall become vested. To date, no RSAs have been granted.

Earnings per share

The following table summarizes the shares used in calculating earnings (loss) per share:

	2022	2021
Weighted average number of shares - basic	27,761,956	29,309,116
Effect of dilutive stock options	-	-
Weighted average number of shares - diluted	27,761,956	29,309,116

Basic earnings (loss) per share are derived by dividing net income (loss) for the year by the weighted average number of common shares outstanding for the period.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

16 Management of capital structure

The Company's objective when managing capital is to ensure the Company is capitalized in a manner which provides a strong financial position for its shareholders.

The Company's capital structure includes the components of equity. In managing its capital structure, the Company considers future investment and acquisition opportunities, potential credit available and potential issuances of new equity. The Company's objective is to maintain a flexible capital structure that will allow it to execute its stated business. There was no change in the Company's strategy or objective in managing capital since the prior year. There are no externally imposed capital requirements at year end. Upon acquiring investment properties and operating businesses, the Company will strive to balance its proportion of debt and equity within its capital structure in accordance with the needs of the continuing business. The Company may, from time to time, issue shares and adjust its spending to manage current and projected proportions as deemed appropriate.

	2022	2021
	\$	\$
Current assets	51,617,254	40,809,029
Current liabilities	<u>(15,461,570)</u>	<u>(13,839,334)</u>
Working capital	<u>36,155,684</u>	<u>26,969,695</u>

The method used by the Company to monitor its capital is based on an assessment of the Company's working capital position relative to its projected obligations.

17 Financial risk management

The Board of Directors ensures that management has put appropriate risk management processes in place. Through the Audit Committee, the Board oversees such risk management procedures and controls. Management provides updates to the Audit Committee on a quarterly basis with respect to risk management.

Catastrophe risk

The Company has obtained insurance on buildings and all permanent fixtures totalling approximately \$6,600,000 effective May 8th 2022 (\$8,300,000 - May 8th 2021). To date the Company has not been able to obtain insurance on its Puerto Rican property with a value of \$1,412,442 at December 31, 2022.

Credit risk

Credit risk is the risk of an unexpected financial loss to the Company if a third party fails to fulfill its performance obligations under the terms of a financial instrument. The Company's credit risk arises principally from the Company's cash and receivables as well as its marketable securities portfolio.

Mongolia Growth Group Ltd.

Notes to the Consolidated Financial Statements

For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

17 Financial risk management (continued)

The Company's maximum exposure to credit risk comprises the carrying values of cash, accounts receivable and marketable securities was \$51,378,065 at December 31, 2022.

The Company's exposure to credit risk is managed through risk management policies and procedures with emphasis on the quality of the investment portfolio. The majority of the funds invested are held in reputable Barbadian, American, Canadian or Mongolian banks (note 5).

The Company is exposed to credit risk as an owner of real estate in that tenants may become unable to pay the contracted rents. The Company mitigates this risk by carrying out appropriate credit checks and related due diligence on the significant tenants. The Company's properties are diversified across commercial classes.

Liquidity risk

Liquidity risk is the risk of having insufficient cash resources to meet financial obligations without raising funds at unfavourable rates or selling assets on a forced basis. Liquidity risk arises from the general business activities and in the course of managing the assets and liabilities. The purpose of liquidity management is to ensure that there is sufficient cash to meet all financial commitments and obligations as they fall due. The liquidity requirements of the Company's business are met primarily by funds generated from operations, liquid investments and income and other returns received on investments. Cash provided from these sources is used primarily for investment property operating expenses.

As at December 31, 2022, the Company does not believe the current maturity profile of the Company lends itself to any material liquidity risk, taking into account the level of cash and marketable securities as at December 31, 2022. All financial assets and liabilities have contractual or expected maturities within 12 months, except for the CEBA loan which has repayment terms described in Note 6. Due to the short term nature of the Company's financial instruments, there is no material impact due to discounting or the time value of money to disclose.

Equity price risk

Equity price risk is the risk that the fair value of equity investments and other holdings and equities sold short and derivatives will vary as a result of changes in the market prices of the holdings. All of the Company's equity investments and other holdings and all of the equities sold short and derivatives are based on quoted market prices as at the consolidated statement of financial position date. Changes in the market price of quoted securities and derivatives may be related to a change in the financial outlook of the investee entities or due to the market in general. Where non-monetary financial instruments – for example, equity securities – are traded in currencies other than the Canadian dollar, the price, initially expressed in a foreign currency and then converted into Canadian dollars, will also fluctuate because of changes in foreign exchange rates.

Securities sold short represent obligations of the Company to make future delivery of specific securities and create an obligation to purchase the security at market prices prevailing at the later delivery date. This creates the risk that the Company's ultimate obligation to satisfy the delivery requirements will exceed the amount of the proceeds initially received or the liability recorded in the consolidated financial statements. In addition, the Company has entered into derivative financial instruments which have a notional value greater than their fair value which is recorded in the consolidated financial statements. This information is disclosed in note 7 to these consolidated financial statements.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

17 Financial risk management (continued)

This creates a risk that the Company could settle these instruments at a value greater or less than the amount that they have been recorded in the consolidated financial statements. The Company's equity investments and other holdings have a downside risk limited to their carrying value, while the risk of equities sold short and derivatives is open-ended. The Company is subject to commercial margin requirements which act as a barrier to the open-ended risks of the equities sold short and derivatives. The Company closely monitors both its equity investments and other holdings and its equities sold short and derivatives.

Currency risk

Currency risk is the risk that the value of monetary financial assets and financial liabilities denominated in foreign currencies will vary as a result of changes in underlying foreign exchange rates. The Company is exposed to currency risk due to potential variations in currencies other than the Canadian dollar.

As at December 31, 2022, the Company had material exposure to foreign currencies. The approximate impact of a 10% fluctuation of the foreign currency against the Canadian dollar are as follows:

	Impact of 10% fluctuation in foreign currency	
	2022	2021
	\$	\$
Mongolian Tögrög	1,080,510	1,304,329
US Dollar	447,292	2,777,545
Russian Ruble	-	182,754

Other price risk

Other price risk market fluctuation risk is where fluctuations in the value of equity securities affect the level and timing of recognition of gains and losses on securities held, and cause changes in realized and unrealized gains and losses. The Company's marketable securities are exposed to other price risk. The approximate impact of a fluctuation of 10% in the price of the marketable securities would impact the value of the marketable securities by \$4,923,751 (2021 - \$3,780,285).

Economic risk

Mongolian tax, currency and customs legislation is subject to varying interpretations, and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Company may be challenged by tax authorities.

Mongolian tax authorities may be taking a more assertive position in their interpretation of the legislation and assessments, and it is possible that transactions and activities that have not been challenged in the past may be challenged by tax authorities. As a result, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for five calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

Mongolia Growth Group Ltd.
Notes to the Consolidated Financial Statements
For the years ended December 31, 2022 and 2021

(Expressed in Canadian dollars)

17 Financial risk management (continued)

Mongolian tax legislation does not provide definitive guidance in certain areas, specifically in areas such as Value added tax (VAT), corporate income tax, personal income tax and other areas. From time to time, the Company adopts interpretations of such uncertain areas that reduce the overall tax rate of the Company. As noted above, such tax positions may come under heightened scrutiny as a result of recent developments in administrative and court practices. The impact of any challenge by the tax authorities cannot be reliably estimated; however, it may be significant to the financial position and/or the overall operations of the entity.

The Company's management believes that its interpretation of the relevant legislation is appropriate and the Company's tax positions will be sustained.

Management performs regular re-assessments of tax risk and its position may change in the future as a result of the change in conditions that cannot be anticipated with sufficient certainty at present.

18 Related party transactions

Parties are generally considered to be related if the parties are under common control or if one party has the ability to control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Key management personnel of the Company include all directors and executive management, and persons directly related to directors and executive management. The summary of compensation for key management personnel is as follows:

	2022	2021
	\$	\$
Salaries and other short-term employee benefits	590,924	597,668
Salaries to other related parties	78,040	63,664
Director fees	60,000	60,000
	728,964	721,332

As at December 31, 2022, amounts due to related parties totaled approximately \$16,446 (2021 - \$140,000) comprised of fees owed to management were included in trade payables and accrued liabilities. During 2022, the Company agreed to reimburse a Company owned by an officer of the Company, \$6,814 for professional fees incurred from shared services (2021- \$233,933). Salaries to other related parties include the salary of an employee that is related to a director.

19 Commitments and contingencies

From time to time and in the normal course of business, claims against the Company may be received. On the basis of management's assessments and professional legal advice, management is of the opinion that no material losses will be incurred and no provision or disclosure has been made in these consolidated financial statements.

The Company has an obligation to provide an 84 meter apartment to an owner of an apartment that has been included in one of the Company's properties classified as land and redevelopment. See note 11 for more information.

The Company indemnifies its directors and officers against any and all claims or losses reasonably incurred in the performance of their service to the Company to the extent permitted by law.

Income tax paid during the year was \$84,164 (2021 - \$2,416). Interest paid during the year was \$22 (2021 - \$74).

21 Segment information

The Company's operations are conducted in three reportable segments; Investment Property Operations, Corporate, and Subscription Products. The Company reports information about its operating segments based on the way management organizes and reports the segments within the organization for making operating decisions and evaluating performance.

Investment Property Operations consist of commercial and residential investment property in Mongolia held for the purposes of rental revenue, capital appreciation or redevelopment. These properties are managed by Big Sky Capital LLC and its subsidiaries.

The Company evaluates performance based on net income (loss) before income taxes.

23 COVID-19

Beginning in February of 2020, the Government of Mongolia undertook extra-ordinary actions in order to limit the spread of COVID-19 or other COVID-19 related impacts. These actions included closing borders, closing schools, reducing gatherings and drastic limitations on business operations. As long-term investors in Mongolia, the Corporation welcomes these actions that keep the people of Mongolia safe from COVID-19. Since the initiation of these actions, the Company has experienced a material reduction in rental revenues received. It is reasonable to expect there could be a material negative impact on the fair values of investment properties and/or marketable securities, however at this time the potential effect cannot be quantified. At this time, there is no way to know the ultimate impact of these extra-ordinary actions upon the economy or the Company.

24 Disposal of Subsidiary

On October 1, 2021, the Company disposed of its interest in its Orpheus LLC subsidiary as a result of the sale of one of its land packages. The Company held 100% of the shares of Orpheus LLC where the only assets and liabilities were related to the property. In connection with the sale, the Company received cash considerations of \$375,244 for assets with a fair market value of \$478,936, resulting in a loss of \$103,692 classified as loss on disposal of investment property in the consolidated statements of operations. Orpheus LLC had \$33,006 other in comprehensive income and it was reclassified to net income for the year.
